ICDF and DSFS co-hosted a one-day event to teach 24 foreign participants from 18 countries about how to convert fish waste into flavors on Sep 30.

NKUST Teams Bags Top 3 at 2022 SEYI Cup

As the pandemic fears wane down, industries resume attending exhibitions. NKUST Mold and Die Engineering Department (MDE) held an award ceremony for the 2022 SEYI Cup on Servo Stamping Process Design and CAE Simulation Analysis on Oct 21 at the International Metal Technology Taiwan (iMT Taiwan) at Kaohsiung Exhibition Center.

The SEYI Cup attracted college student teams and teams formed by professionals from corporates or governmental institutes, showing their techniques and skills in metal forming technology.

Sheu, Jinn-Jong (許進忠), Director of ARFSMT said: "With SEYI's support on instruments, we encourage student teams to explore new thoughts and methods for mold design. We also appreciate corporates financially supporting the Cup so that we can offer winners with generous cash prizes. For instance, the first place will be awarded NT\$60,000."

Director Sheu commented that more than 20 student groups passed the preliminary contest of the SEYI Cup, and eight made it into the final contest. In the final, three teams from Mechatronics Engineering Department (MAD), Mechanical Engineering Department (ME), and MDE bagged the top three awards.

Vocabulary

1. **wane** **v** 減弱；衰減
2. **resume** **v** (中斷後) 繼續；重新開始
3. **simulation** **n** 模仿；類比
